

Research and User Support : the new expert service for Sentinel users

- Get expertise through a simple registration on line and access to the dedicated front desk
 - Get technical solutions tailored to your needs and your requests
 - Get advice and support to visualise, to convert, and to interpret EO data coming from the Sentinels
 - RUS offers a scalable platform in a powerful computing environment, preinstalled virtual machines and free open-source toolboxes
 - RUS provides an adaptable working environment which allows users to develop and prototype their own algorithms and tools
- Regular training sessions are organised for all kinds of users:
- Online tutorials and webinars accessible to all users
 - Face-to face training sessions to handle and process data
 - « Train-The-Trainers » events for future trainers
